**January 14**

✿ **Mark Turner**

**37 Native Gems for PNW Gardens**

5000+ species of plants are native to the Pacific Northwest from delicate annuals to towering conifers.

Stunning photography will show garden-worthy selections for both spotlight and problem areas: wet shade? dry shade? sun-baked west-facing slope? Learn about natives that could fit your personal landscape.

**January 21**

✿ **Linda Beutler**

**Clematis All Year**

Join clematis author and curator for a tour of clematis as they bloom through the four seasons. Careful selections allow gardeners in maritime climates to have clematis in bloom 365 days a year! Linda's talk will cover cultivation, selection for color, bloom time and re-bloom options.

time climates to have clematis in bloom 365 days a year! Linda's talk will cover cultivation, selection for color, bloom time and re-bloom options.

**January 28**

✿ **Judy Alexander** ✿ **Lys Burden**

✿ **Zach Gayne** ✿ **Karen Kastel** ✿ **Seth Rolland**

**Cultivating Community: How Local Programs Are Enhancing Food Security**

Come learn about some of the many programs that are delivering huge amounts of locally grown food to a network of agencies, schools, housing facilities, and people's homes. Get inspired! Join the local food movement and access to local, healthy, organic, fresh fruit and vegetables!

**jcmg.org**

**February 4**

✿ **Kathy Hawkins**

✿ **Arlene West**

**Whether Your Container is Round or Not**

Learn tips and tricks to take container planting from ordinary to extraordinary. With a planting demonstration and slides to inspire creativity, Kathy and Arlene will show useful plants that last all year, seasonal color splashes, reading color clues and textures, adding spring and summer vegetables.

**February 11**

✿ **Joe Arnett**

**Rare Native Plants**

Learn about beautiful rare plants and how they are studied from Joe Arnett, a rare plant botanist for the Washington Natural Heritage Program. The science-based program maintains a statewide database of rare species and provides support for conserving biological diversity.

✿ **Cori Carlton**

**Slugs101 - Friends or Foes?**

What has one foot, one lung, and more teeth than a shark? Earn your degree in "slugology" by learning the basics of slug life, the benefits of native slugs and why non-natives eat your precious plants. Join a slimy good time and get slugs to work for you!

**February 18**

✿ **Richard Lewis**

**Bugs: The Good, Bad, & the Beautiful**

Most bugs are harmless or beneficial. Richard will present the basic principles of safe, effective and environmentally sound pest management to minimize damage caused to tree fruits, gardens and ornamentals by the key pests we encounter in this area. He will also address how to attract and maintain native pollinators.

# Yard & Garden Lecture Series 2017
