**January 12 Bonnie Orr**  
Mulches and Compost

This session is designed for those who know the basics of how to compost, make it work effectively in various forms, and how to use the completed product. There are a variety of mulches available to gardeners. The secret of effective mulching is using them correctly. Learn how to compost and mulch so your garden is fabulous next summer.

**January 19 Lys Burden/Nita Wester**  
Growing Your Own Food

In an illustrated presentation Nita and Lys will share tips on growing your own organic vegetables year around — winter too!

Using WSU peer reviewed publications, their favorite resources, and stories of personal gardening successes and failures that have inspired them to keep learning and practicing what they have learned. They are continually reminded that the healthiest gardens always mimic nature.

**January 26 Judith Johnson/Mary Robson**  
Color in the Garden Year Round

Color—basic to all beautiful gardens—depends on choices. Judy and Mary have decades of experience planning and planting gardens.

Their presentation includes vivid images of perennials, shrubs and trees chosen for compatibility and appearance in the NW garden.

**February 2 Richie Steffen**  
Great Plant Picks for All Seasons

The mild maritime Olympic Peninsula weather allows us to create beautiful gardens 12 months of the year. There are a wide selection of top performing plants that hold multiple seasons of interest, or provide a spectacular show for specific times of the year. Richie will share great combinations and useful tips for a stunning four-season garden.

**February 9 Keith Dekker**  
Pruning in the Pacific Northwest Landscape

This class is for those that are unsure if they making the right cut when pruning. Will the plant look like I want it to look? Will it stay that way? Find out how to selectively prune plants, taking into account a plan's natural shapes and characteristics. Everything from the correct tool to use, how a plant reacts to pruning, will be covered. Plant habits, pruning budgets, and rehabilitative pruning will be included in this talk.

**February 16 Jeanmarie Morelli**  
Preserving Vital Pollinators

Pollinators have great benefit for the garden and ecosystems. Understanding the lifecycles of the various pollinators allows us to provide for them at each stage of development, and to recognize and protect their habitats. Jeanmarie will also look at the best plants for supporting pollinators in our region.

To purchase Series Tickets, complete this form and mail it, with your check to:

**Yard and Garden Lecture Series**

**620 H Street**

**Port Townsend, WA 98368**
